

A guide to uploading files to We Transfer.

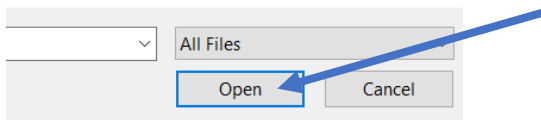

First, go to www.wetransfer.com

The website might first try to advertise the Pro version to you, but click on 'no thanks' and you will be taken to the free version.

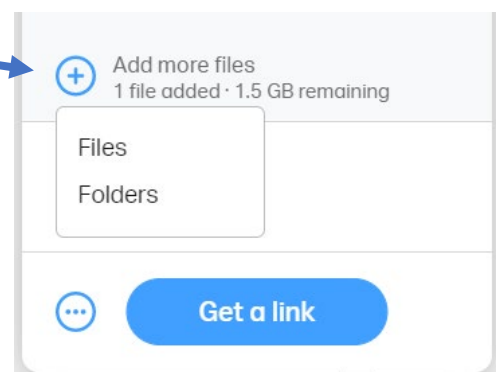

1. Click on the blue circle to add the video you want to send.

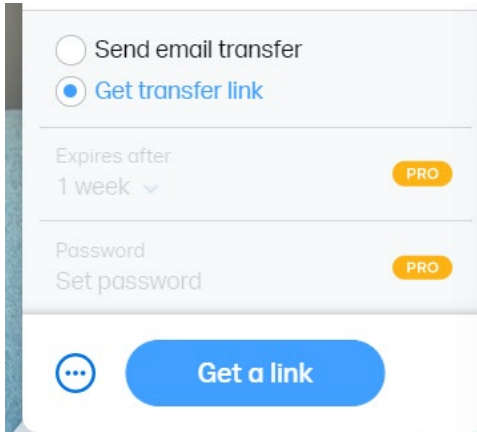

2. Click 'open' when you have selected your file.

3. When you have uploaded one video, you can upload another as seen in the shot below. Click 'add more files' and select another video.

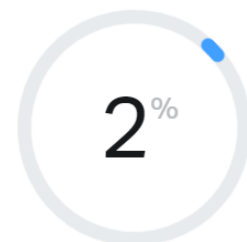

4. Make sure that you have selected 'get transfer link' (as highlighted on the left) and then click on 'get link' as this means you don't need to sign up to We Transfer and it will be free for you. You will still have the same high level of security when transferring files when you send this way.

5. When you click 'Get a link' your video will start uploading the transfer. This could take between 2-10 minutes depending on your internet speed.

We would recommend using a laptop/computer and not a mobile phone to do this as uploading with a mobile phone with slow connection can take a much longer time.

6. When it's finished uploading, you will see the message below and a link to copy. Click on the blue 'copy link'

7. You can now send this link to us so we can download it edit the videos for you. Just send us an email at sar@adoptionregister.scot with the link you've copied. The easiest way to paste the link into the email is to press the Ctrl and V button on your keyboard at the same time, or right click with your mouse and select 'paste'.
